Personal Photography Mentoring with

I'm so glad you are here!

Some background you should know...

Learning is a such a personal experience and while classes and workshops are fun, they never seem to be at a convenient time for everyone. Even when you can attend, there is always something more you wanted to ask or maybe you are more advanced than others in attendance and left unfulfilled. If you are like me, learning in a one-on-one, hands-on scenario is the most effective way to learn AND use your new skills.

So I'm glad you are here reading this.

You get 100% of my knowledge which began in high school classes, fueled by reading magazines and books, mastered with a Bachelor of Fine Arts Degree in Photography, followed by thousands of hours of continuing education, being professionally coached and 25+ years of professional working experience!

Teaching what I have spent my life learning is a way I can give back. It's simple...I love photography. It has been a part of my life since I was in grade school (that's a REALLY long time!) and I've had a passion and drive to learn everything I can since I first picked up a camera. As I reflect, I realize I am happiest when I'm sharing with people and building relationships. I adore creating images but there is something fulfilling by teaching others. I led my first class at the age of 15 and I have been facilitating a variety of adult classes ever since.

My passion for photography is infused in my DNA (well, it's never actually been tested but I'm guessing there is a strand of "Canon" in mine!).

I become fired up preparing each person's mentoring session, and as your passion and skill sets grow I learn from you by witnessing the way you see and interpret everything around you. But most importantly...WE HAVE FUN...

I invite you to browse through this program guide. I'm sure you will find areas that would interest you - it can be any topic regardless of your level of expertise.

Give me a call or email me and we can plan a curriculum for you that will bring your photography to a whole new, fresh level!

Individualized Mentoring Sessions FAQ

No matter your level of photography, we love to work with people who have the interest and motivation to improve and grow in their photographic skills. All we require is to have a commitment to learning.

“Who will you coach?” We cater to people from all different phases of life, ages and interests.

“What do you offer?” The scope of our Mentoring can be as simple as a 15 minute on-line meeting or phone call that will answer questions and offer ideas to a hands-on, two hour learning package that begins with an introductory call to begin to develop a personal learning plan.

“Can I learn about anything?” Mentoring can cover any topics important to you. They may include how to use a digital camera, working with digital files, taking better family and sports pics, vacation and children’s photos, help with a personal photographic project, simple tips and techniques from a professional level, lighting or just help understanding what equipment would be right for you.

“What’s an Individual Mentoring Plan?” We will work with you to develop a fully structured course around your specific interests, based on your skill level, pace you want to work at and your learning style. It can be based on what photographic genre you want to learn as well. Portraiture, landscape or sports are just a few topic ideas.

“What about my friends?” We can incorporate a spouse or friend into the same Mentoring session or perhaps you’d like to host a workshop for your friends who want to learn about a specific topic and want to learn together.

“What about after the Mentoring session?” Anyone who works with us through private Mentoring is encouraged to stay in touch in between Mentoring sessions with our email support to ask brief questions, and will be invited to participate in our [Private Mentoring Forum](#) on Facebook. This is a great place to review work and share ideas with others who have been in our Mentoring program.

“What if I have other questions before I decide?” I am happy to speak with you and answer any questions you may have. Call 570-282-4090.
